

FISCHER JETplast®

Kunststoff-Strahlmittel . Plastic Blast Media

PA6

Trade Name:	FISCHER JETplast® Type PA6
Application:	Deflashing medium for thermoset parts.
Chemical Characteristics:	Polyamid, extruded
Shape:	cylindrical, cubical
Color:	red, blue, nature
Standard Grits:	0,50 x 0,50 mm 0,75 x 0,75 mm 1,00 x 1,00 mm 1,50 x 1,50 mm
Packing:	20 kg each PE-bag (transparent) max. 50 PE-bags in carton each palette = 1.000 kg

Advantages:

- * Manufactured strictly of high quality polyamide granule,- no recycle
- * Each production lot is tested for size and quality
- * Increased effectiveness, in particular with cubical shape
- * Best cutting feature → high dimensional precision and stability of particles
- * Low production cost → extremely low wearing and only marginal dust formation
- * Long endurance

→ **excellent price / efficiency relation**
